CAREER OBJECTIVE

An aspiring BTech student specializing in Artificial Intelligence and Data Science, with a strong foundation in data science principles and web development. Eager to apply my technical skills and hands-on project experience to contribute to innovative data-driven solutions.

EDUCATION

Velammal Engineering College

2023 – 2027

BTech in Artificial Intelligence and Data Science

CGPA: 8.3

TECHNICAL SKILLS

- **Programming Languages:** Python, Java
- **Databases:** SQL, MongoDB
- **Web Development:** HTML, CSS, JavaScript, FastAPI
- **AI/ML:** Machine Learning, Deep Learning, NLP
- **Tools:** Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Streamlit, MS Office

EXPERIENCE

CodSoft Internship | Python Programming

2024

- Developed foundational utility applications in Python, including a task management system (To-Do list), a functional calculator, and a secure password generation script.
- Strengthened core programming skills by implementing control structures, user input validation, and application logic to build efficient, user-friendly scripts.

Trios Technologies | AI Trainee

2026

- Built data-driven mini-projects applying concepts in Machine Learning, Deep Learning, and Natural Language Processing (NLP)
- Executed end-to-end ML workflows, handling data preprocessing, model development, and performance evaluation using Python.

PROJECTS

Cinesphere (AI Movie Recommendation & Social Platform)

- Developed a full-stack web application that delivers personalized movie recommendations using content-based filtering, TF-IDF vectorization, and hybrid ranking techniques.
- Developed community features including posts, comments, messaging, and notifications to encourage user engagement.
- Integrated TMDb movie data and built secure authentication and backend services for efficient data management.
- **Technologies:** React.js, TypeScript, FastAPI, Python, MongoDB, SQLite, Scikit-Learn, Tailwind

CSS, TMDB API.

AI-Powered Forensic Triage & Postmortem Intelligence System

- Collaborated with a team during the AIVENTRA 24-hour offline hackathon to conceptualize and generate a multi-modal forensic analysis system.
- Utilized advanced prompt engineering to direct the AI in analyzing CCTV footage, images, and text to construct event timelines and output explainable risk assessments.
- **Technologies:** Prompt Engineering, Medo AI Platform, Multi-modal AI, Applied NLP

Housing Price Prediction Dashboard

- Designed a Streamlit-based machine learning application for predicting house prices and analyzing housing market trends using real-world datasets.
- **Technologies:** Python, Streamlit, Pandas, Scikit-learn, Plotly

Student Performance Analyzer

- Created a data analytics dashboard for monitoring student performance, calculating grades, identifying at-risk students, and generating interactive visual reports
- **Technologies:** Python, Streamlit, Pandas, Plotly

RESEARCH PUBLICATION

Intelligent Movie Recommendation and Community-Based Social Platform Using Machine Learning – Cinesphere

- Published in the Department of Artificial Intelligence & Data Science Conference, Velammal Engineering College, 2026.
- Developed a machine learning-based personalized movie recommendation system with community-driven social interaction features.
- Publication: [Google Drive Link](#)

CERTIFICATIONS

- NPTEL – Certified in Python for Data Science | 2024
- NPTEL – Certified in Cloud Computing | 2026
- PySpark Certification – Velammal Engineering College & Imarticus Learning (Skill India / NSDC Approved) | 2025

SOFT SKILLS

- Problem Solving
- Team Collaboration
- Adaptability
- Communication Skills
- Time Management
